

When using pulsating tools it is recommended to observe the standard ISO 6150, § 7.1.

It recommends installing a minimum 300 mm long, flexible hose between the pulsating tool and the quick-connect coupling.

The oscillating forces are taken by the hose piece and thus increase the service life of the quick-connect coupling. No warranty can be made for couplings mounted directly on pulsating tools.

Max. operating pressure

15 bar

Temperature range

-20 °C to 60 °C

Vibration damper with 300 mm PVC workshop hose
